COMPLETE THIS SECTION FOR TEMPORARY STARTS

(ONLY a "Pipe Inspection" is allowed BEFORE APPROVED FIRE SPRINKLER PLANS ARE ON SITE).

A "Temporary Start" may be issued on jobs **only AFTER plans have been reviewed at least once and then it is up to the Plan Reviewer if one will be approved or not.** Corrected sets of rejected plans must be resubmitted within 3 days of plans being reviewed.

A Temporary Start authorizes work to start on a job prior to sprinkler plans being approved (see above for exceptions). I understand that plan approval may change the design of the submitted plans. I take full responsibility to make any and all necessary corrections, even if the materials are on site and/or installed, to comply with the approved system design.
